CSX and PacketFabric

ColoCSX Improves its Ability to Serve its Customers with PacketFabric

COMPANY OVERVIEW

ColoCSX is a premiere colocation provider in Jacksonville Florida that offers enterprises a leadership-driven, customer focused and cloud-connected facility. Our unique capabilities provide organizations unmatched privacy, security and peace of mind. Since 2002, ColoCSX has been serving the needs and delivering confidence to top healthcare, financial and government organizations.

ColoCSX' longevity and corporate commitment allow the company to provide an unparalleled customer experience, flexible consumption-based pricing, and enterprise-focused service standards.

The Results

By connecting to PacketFabric's platform in CSX' data center, ColoCSX customers gain instant, private access to every other location on PacketFabric's network.

This allows ColoCSX to enhance services to customers by offering private interconnection capabilities through PacketFabric's platform. From a single physical interface, ColoCSX' customers create multiple virtual connections to other destinations on PacketFabric platforms. A few common use cases that are now possible:

- Privately connect to public cloud service providers, such as Amazon Web Services, Google Cloud Platform, Microsoft Azure, IBM Cloud, Oracle, and more
- Interconnect with internet exchange providers, such as DE-CIX, Mass IX, and NYIIX
- Order, provision, and manage private network services, available from 1Gbps to multi-100Gbps, with flexible, month-to-month terms, and transparent pricing
- Create instant connectivity to 160+ data center locations in 24+ markets in the United States, Europe, and Asia Pacific

Both companies benefit from this partnership; ColoCSX is able to immediately expand their service offerings, and PacketFabric's customers gain another entry point to its fabric in Northeast Florida.

Business Challenge

Since 2002, ColoCSX has provided its clients with unique industry leading colocation advantages in availability, physical security and consumption-based pricing. Our corporate commitment to innovation, efficiency and customer satisfaction progresses the need to expand services to meet the needs of an enhanced cloud-ready colocation facility.

In order to meet the current and future connectivity challenges of a modern colocation facility, ColoCSX needed a solution that allowed connectivity to public and private clouds, access peering, and a variety of Internet services easily, economically, and instantly. By partnering with PacketFabric, ColoCSX can simplify the customer journey, evolve customer capability and improve business outcomes.

The Solution

PacketFabric installed gear in ColoCSX' data center location, adding ColoCSX as an additional Point of Presence (PoP) to its network, and empowering ColoCSX to gain private access to its network-as-a-service platform by requesting a cross connect through ColoCSX.

About ColoCSX

ColoCSX allows your organization to utilize a shared data center facility that provides space, power, cooling, and physical security services. Leveraging these services can reduce data center costs and risk while improving operational efficiencies.

ColoCSX collaborates with mid-to-large size enterprise companies to provide secure, survivable colocation services to protect business critical information systems. With more than 20 years of operational experience, we are prepared to provide you with the best data center infrastructure and service in the industry.

About PacketFabric

PacketFabric is the next generation network service provider. Pricing is transparent, services are provisioned through its portal in minutes, and our API provides extensible automation.

We're the highly scalable network-as-a-service platform: the perfect marriage of SaaS and carrier network, with terabits of capacity to wherever business takes you.
